## DETAILED ACTION

### *Claim Objections*

Claim 2 is objected to because of the following informalities: "support:" (line 11) should be –support;–.

Claim 5 is objected to because of the following informalities: "greater then" (line 14) should be –greater than—.

Claim 10 is objected to because the term "increasing" is relative, and requires a reference point not currently recited in the claim.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 9, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over A.A.P.A. in view of Will et al. (US 4,891,551).

A.A.P.A. discloses a fluorescent tanning lamp adapted for operating at currents greater than 800 milliamperes (Spec., Page 2, Lines 1-3). A.A.P.A. does not disclose the particular structure of the lamp. Will et al. teach a fluorescent lamp comprising:

Art Unit: 2833

a fluorescent tube 1;  
an electrode 6 placed within said fluorescent tube;  
an electrode support 7 holding said electrode;  
a stem 12 holding said electrode support within said fluorescent tube; and  
a cylindrical metal cup 9 having an open end opposite said electrode and  
positioned to surround said electrode, said cup being held by said electrode support;  
means/bracket/L-shaped cup support 10, attached to said metal cup, for  
dissipating heat, having a width substantially greater than a diameter of said electrode  
support;  
the metal cup being electrically coupled to said electrode support and one end of  
said bracket attached to said metal cup and another end of said bracket attached to  
said electrode support.

Regarding the limitation, "whereby said cup shields said electrode and causes  
heat to be dissipated through said electrode support," the structure provided inherently  
suggests the function.

It would have been obvious to one having ordinary skill in the art to modify the  
tanning lamp of A.A.P.A. with the structure that Will et al. teach for a fluorescent lamp to  
reduce lamp power dissipation.

***Allowable Subject Matter***

Claim 10 is allowed.

Art Unit: 2833

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest a slot in the bottom of each cup adapted to pass an electrode support through the slot and each support attached to the bottom of the cup.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 5 and 9 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2833

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
